

# BS Battery and Charger

THE new BS Battery line was exhibited for the first time at EICMA 2009, introducing a full range of Powersport batteries specifically designed for high performance motorcycles and scooters.

The main characteristics are high technology, more power, long life and minimum maintenance. According to the company the whole product line has been developed to very high production standards and complies with European and US certifications with all the relevant certifications.

BS 2000mA charger

The company also makes the BS Charger battery charger range with output current from 0.6A to 21A, specially designed for all 6V, 12V, 24V and 36V lead acid batteries, conventional, maintenance free, gel or AGM.

All the chargers optimise battery power and life
