

BK20: Smart Charging Solution!

Mainly developed for warehouses and garages, BK 20 is a real 3 in 1 solution which save time for mechanics and provide a quality service to the end users.

Smart bank battery charger and maintainer, which offers 3 channels of charge, BK 20 can charge and maintains 3 batteries with different voltage (6/12V) and technologies at once.

Rated at 2A per channel, this powerful automatic charger is suitable for Lead Acid and Lithium batteries up to 40Ah and even 80Ah for maintenance.

Very safe and easy to use, BK 20 has 10 stages of charge including a new force mode to enhance the performance of all your powersports batteries.

Delivered with 3 BS clamps set for a quick connection, this solution is a useful time saver for the workshops and mechanics who

need to set up fresh batteries.

In addition, BS Battery has also designed a Charging Station including one product display with an assembly part to mount up x2 BK20 Smart Chargers! The perfect solution for all the shops who want to exhibit their products and ensure a high-quality service by providing batteries fully charged to the end-users.
