## BS Battery expands its Lithium battery line-up with a new model BSLi-14

With special dimensions of 114x70x105mm and high CCA, the brand-new BSLi-14 is designed to replace Honda's original equipment on Africa Twin CRF1100 model.

Equipped with brass terminals to enhance electrical performance, this new model also includes a LED indicator on the top to easily monitor the state of charge.

Ready to use, easy to mount with an inclination up to 180°, BS Battery Lithium range has been developed for riders who look for higher and safer performance, faster acceleration, reduced weight, and longer battery life.

With a very low self-discharge, the BSLi-14 can start an engine after a very long period of storage, even in cold temperature conditions.
