SLA (Sealed Lead Acid) batteries make riders' lives easier. No more acid handling nor inevitable waiting for battery charge! Everything becomes much more simple! Ready to use, the SLA batteries are Factory Activated, completely spillproof and require no maintenance.
A new environment for powersport battery: it becomes a plug & play solution, extremely simple to install and carry! Our SLA offer is the widest ready to use range available on the market.

MF | MAINTENANCE FREE

ORIGINAL EQUIPMENT OEM MANUFACTURER

ORIGINAL EQUIPMENT OES SUPPLIER

Supplied with an acid pack, MF batteries must be activated by filling the acid before first use. Totally sealed once activated, the gas recombination technology doesn't require maintenance or any water refiling. Utilizing advanced AGM (Absorbent Glass Mat) technology, these batteries are perfectly suitable for most powersport applications.

DRY | CONVENTIONAL

Conventional batteries are Lead Acid flooded batteries that must be filled before first use with a periodic maintenance. Conventional batteries include a sulfation retardant technology which reduces battery-killing plate sulfation.
This results in a longer battery life, especially in standby or storage mode. These conventional batteries are perfectly suitable for entry-level powersport and lawn & garden vehicles with standard requirements.

DRY | CONVENTIONAL

Conventional batteries are Lead Acid flooded batteries that must be filled before first use with a periodic maintenance. Conventional batteries include a sulfation retardant technology which reduces battery-killing plate sulfation. This results in a longer battery life, especially in standby or storage mode. These conventional batteries are perfectly suitable for entry-level powersport and lawn & garden vehicles with standard requirements.
