BATTERY COMPATIBILITY

SUITABLE FOR

INSTRUCTIONS

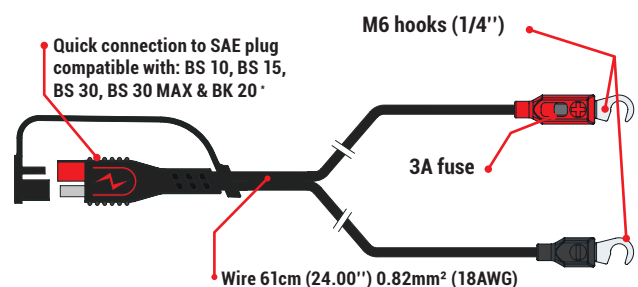

This hook terminal connection is the ideal solution if your battery is difficult to access, hidden or if you cannot use clamps. Just connect the hook terminals to the battery and charge normally.

This accessory is compatible with BS chargers and any chargers equipped with SAE plug.

STEPS:

1. Unscrew a few turns of two screws on the battery (not completely unscrew) first.
2. Connect red hook on positive battery terminal (+). Hook terminal can be put under the screw, and the crew it up tight.
3. Connect black hook on negative battery terminal (-). Hook terminal can be put under the screw, and the crew it up tight.
4. Connect the SAE connection of this accessory to the SAE connection of your charger.

DRAWING

* Compatible with any chargers equipped with SAE plug.
